VEERS LIKE A VANE

WHEAT BLOW HOT AND COLD LIKE A KANA ZEPHYR.

Early Advance of a Cent is Quickly Checked by Governmental Report, Large Receipts and Free elling, and the Market Lands Lower - Corn Hovers Around the Bottom and Oats and Provisions are Sympathetic.

CHICAGO, March 12.—Wheat went up and down the scale today with the ease and celer-ity of a street plano, landing I cent lower than Saturday, after a weak opening and an early advance of I cent. The government report, lower cables, large northwestern receipts and tree willing overnment the advance caused free selling overcame the advance caused early by brisk buying, and May closed at 1½ cent from the bottom, Corn averaged firm and closed with May unchanged. May oats closed unchanged, while provisions, in sympathy with wheat, closed weak and lower all around.

See York Coffee. wer all around. Wheat at the opening showed the effect of

w neat at the opening showed the effect of the government report of farm reserves, which came to hand Saturday afternoon. The opening sales for May were at from 50½ and 50 cents with the tendency for a few minutes to settle down around the lower figure. There was a sudden recovery brought about by some demonstrative buying by Armour & Co's brokers, who took several good sized lots thich were being offered at 50 cents, and kept response to their action. Buying became so general from the cause mentioned, that Armour's men were able to sell out a good deal of the wheat they bought at from 30 cents up to 50 k when it advanced to 50 k and over, as it did in a very few minutes, following the lead given to it. As high as 60 cents was paid for a little May wheat before the frightened shorts recognized that they were being chased by the mere shadow of their own imaginations. The price after that began to work back to its starting point, at which some further moderate purchases for Armour & Co. steadied it again. The visible supply decreased about as had been expected. The amount of the decrease was 962,000 bushels, compared with an increase of 15,000 bushels. compared with an increase of 15,0:0 bushels on the corresponding week of the previous year. A second decline in the price occurred immediately after the decrease in the visible supply was known. The day's receipts w re only 23 car loads against 230 a year ago. Min-neapolis reported 432 cars and Duluth 81, against 673 and Is respectively a year ago.
After a struggle at around 59, there began to
be a perceptible weakening of the bull side
and finally the price came down with a run and did not cease tumbling until it struck 58%. A correction in the visible supply fig-ures, making the week's decrease 1,002,000 in-stead of 967,000 bushels as at first reported, did not help the price much, as there were sollers at 58% as the session ended.

when it went so far in the way of bearishness as it did in the latter half of the session. The as it did in the latter half of the session. The government report was slightly bearish and itseffect was seen by a decline of ½ cent at the start, as compared with Saturday's closing price for May. It recovered with the first jump in wheat, rising from 37½ cents pear the start for May to 38½638½ cents, and worked off again when wheat was deciling until it was again down around the low point touched in the first few minutes of the session. The closing price was but 3 cent from the

kets in the firmness which they experienced later on in the day. There was also a good many oats bought up, and with the light offerings this had a strengthening effect on the market. After the prices had advanced S₂ cent from the opening price and the buying orders were mostly filled, the price declined again and business was rather quict from that time up to the close. A decrease of 172,000 bushels in the visible supply had some effect in retaining the strength. During the early part of the session quite a large amount of business was transacted. Notion Worthing-ton, Schwartz, Dupee & Co., B. r. lett. Frazier and R. E. Fratt were all free buyers. The seiling was scattered. The market continued

within is cent of the last prices on Saturday. In provisions there was a good deal of realizing of long stuff today, with the shorts apparently so certain of their position that they slump in wheat, started at the opening. There wheat, provisions became very limp and had a had break. Compared with Saturday's closing prices pork is 27% cents lower, lard is off 15 cents and ribs are also 15 cents lower, estimated receipts for tomorrow: Wheat, Scars; corn, 330 cars; oats, 230 cars; hogs,

NEW YORK, March 12.-A fairly active spec lation marked the opening of business on the Stock exchange and a strong tone characterized the dealings, most of the active shares showing an advance from the closing figures of Saturday. Sugar, while not so largely dealt in as usual, was in good demand, opening 1½ per cent higher and making an additional advance of ¾ per cent. The higher figures induced realizations, which led to a reaction, and the short interest, encouraged by this depression, threw out a few lines with the result of causing decline, which, however, was effected very gradually, of ¾ per cent. In the later dealings a recovery of ¾ per cent. later dealings a recovery of 32 per cent was made, of which 34 per cent was lost at the close, leaving only a gain of 14 per cent on the day. St. Paul led the market in point of activity and on buying for a pool said to be identical with the party who recently ran up Sugar and Burlington, rose 1/2 per cent to 63. London houses sold some small lots and the London houses sold some small lots and the room tracers took the profits, sending the stock down to \$2\cap{4}\$, the last sale being at a recovery of \(\cap{4}\) per cent. Chicago, Buriington and Quincy, after an advance of \(\cap{4}\) per cent in the opening, fell of \(\cap{4}\) per cent and rallied \(\cap{4}\) per cent and rallied \(\cap{4}\) per cent. Chicago Gas rose \(\frac{1}{2}\) per cent on buying, a large portion of which was on orders from Chicago. During the afternoon the support was withdrawn and a reaction of 1 per cent was effected with a subsequent recovery of \(\cap{4}\) per cent. Distilling, after an early advance of \(\cap{4}\) per cent, lost the improvement and later railled \(\cap{4}\) per cent. The National Lead shares were the features of the speculation, being bought heavily on the better prospects being bought heavily on the better prospects of the company, in view of the fact that the proposed arrifbill'is less unfavorable than was expected. The common stock advanced 24 per cent, and the preferred 1½ per cent, both closing at the top price. The rest of the mar-ket was active during the morning, but be-came rather heavy toward midday, but the early improvement was only partially lost. During the last haif hour the buying was good and speculation closed firm, the great majori-ty of the list showing an advance on the clos-

NEW YORK PRESBYTERY. NEW YOLK, March 12.—The New York Presbytery held its monthly meeting tod-y. Several young men were presented to the Presbytery prior to admission to the ministry, and after the usual questions had been put and answered favorably by the candidates, Dr. G. L. Shearar created a commotion by saying that it would be well to ask these young men whether they are attending any seminary not recom-mended by this body and the general as-sembly. This practically introduced the Briggs question in the case and a dozen ministers were on their feet in an instant. Dr. Ross said it would be time enough to inquire the place where candidates studied theology when they came up for flual license. Dr. Charles Thompson said he was not aware of anything that could prevent the candidates from attend-ing any seminary they desired. He did not know but what a student had a right to enter a seminary not approved by the are attending any seminary not recomto enter a seminary not approved by the general assembly. Dr. John Hallam, amidst the clamor, said: "I think we should exercise a little peace and magnanmity." Finally, after much debate, the xuestion was put and carried, there being

GREAT ELECTRIC MONOPOLY. ALBANY, N. Y., March 12 .- The state of New York today made the greatest con-tract with a corporation ever proposed when it presented to the Cataract General Electric company, which is merely a branch of the Niagara Power company, the right of way along the canals of the state to lay conduits, string wires and otherwise transmit the electric currents generated at Niagara Falls. The contract presented by Superintendent of Public Works Hannan, and which the company will sign, allows the company to string wires, build conduits, build a traction road for canal propulsion and establish central power stations at such points as they deem necessary along the line of all the canals. It also authorizes cables, conduits and subways to be constructed. They may according to the contract use such electricity distributed, not only for canal propulsion, but for light, heat and power to such points as they please.

FIRE BUGS CAUGHT.

CHICAGO, March 12.-Frank Brown and J. A. Wilmer, merchants of Goshen, Indians, were arrested here on a charge of being members of a gang of "fire bugs." Max Blank has been arrested at Grand Rapids, Michigan, and today Martin Colen was taken into custody in this city. Both are alleged to be members of the same gang. It is asserted that within two years these men have swindled fire insurance companies out of over \$61,000. They have operated in Fort Worth, Texas, Kansas City, Abilene, Kansas, Chicago and several other points. Their method was to rent a store, put in a new stock, insure it for three times its value and then fire it. diana, were arrested here on a charge of

CORPORATIONS IN COURT.

CINCINNATI, O., March 12 -Judge Taft, in the case of the Western Union and four express companies, to enjoin the state board of appraisers from certifying to county auditors their franchises and to declare the Nichols law unconstitutional, rendered a partial decision holding that the plaintiffs admitted, with one exception, that they held \$850,000 worth of property powerless. and that it departs from the Ohio state rule as to the method of appraising taxes.

DEBS' DEBUT.

TERRE HAUTE, Ind., March 12.—Eugene Debs, president of the American Railway lists tonight announced that he would vote the ticket of that party this year and would urge laboring men to do the same as the only means of electing men who would be true friends of labor. He has always been a Democrat. He said there was no longer any material difference between the Democrats and the Republicans on the tariff and finance questions. Morton Rankin, who is trrasurer tions. Morton Rankin, who is trrasurer of the populist national committee, says Debs will be their candidate for governor

PARIS, March 12.—The municipal council had a stormy meeting this afternoon.

M. Fournier, a Socialist member, denounced the wholesale arrest of Anarchists and protested against the continuation of exaggerated measures which he said would merely lead so a popular panic There was a violent exchange of words between the Socialist members and the members of the Right, the latter being accused of propagating Annarchy with secret motives. The council passed a resolution protesting against arbitrary arrests and searches as encrouching upon the liberty of the people. PARIS, March 12.-The municipal coun

LONDON MONEY MARKET. NEW YORK, March 12.-Tue Post's Lon-

don cablegram says:

The Indian import duty on sliver is now a law, but the silver market was steady today at 27% pence. China buys into May at 27%. Four lakhs of rupees were sold by the Indian council at 14.32 peace.

The stock markets were quiet, pending the settlement which begins tomorrow. Americans only were active. The markets closed near the best with signs of the public coming in. Thirty thousand in gold came in from the continent today. ion cablegram says:

sembly tonight Assemblyman Sulzer, during a speech on a certain bill, declared "That the homicide in the Republican Thirteenth ward of the city of Troy was the result of a contest between the American Protective Association and the Cathelies"

Assemblyman Ainsworth declared that Governor Flower and the chairman of the Democratic state committee were respon-sible by their interference and influence for the scene enacted at the Troy election. PAPAL CHAMBERLAIN DEAD. ROME, March 12.—Prince Giovanni, Col-lonus, hereditary papal chamberlain, died

CURE BY SHOCKING

Meetricity Is Soon to Be Employed in Medicine.

The Current to Be Applied in the Treat ment of Hemorrhage—One of the Most Wonderful Discoveries of Mod-

One of the most wonderful modern liscoveries in the region of electro therapy is the system of "cupric elec-trolysis" brought out by Gautier, of Paris, by which a metallic deposit can be made on any part of the body, in-ternal or external, says the Eoston Transcript. The process will be understood by recalling the fact that an iron needle connected to the "positive" pole, plunged into human tissue, is quickly attacked by the oxygen and chlorine set free at this pole, is converted into oxychloride of iron, double salt, and is soon completely destroyed. The same is true of any metal attacked by oxygen or chlorine. A copper needle or bulb or other conveniently shaped electrode penetrating tissue or laid against mucous membrane, especially within the cavities of the body, is converted into oxychloride of copper, zine into oxychloride of gine and so on.

This method has only recently been introduced into this country, but its benefits promise to be far reaching when it is brought into general practice. In gynecological work especially it secures results attainable by no other means, as the introduction of the positive copper sound affords not only the intrinsic advantage of the current, but also the further beneficial action of an antiseptic salt, whose permeation into the tissues contributes to their strength and nutrition. In other words, the metallic deposit is first made, and then, by what is termed "cataphoresis," driven into the tissues. It is highly probable that this will be the treatment of the future in catarrh cases. A copper bulb through which an electric current is passing is swept over the nasal, throat and mucous membranes and deposits and drives in the copper salts. This method is both rapid and painless and its effects are described as magical. An eminont electrotherapeutist states that in his hands its results far surpass the most sanguine claim of any other treatment. It is also likely to create a new practice in the antisept-icizing and healing of unhealthy ulcerations and discharging cavities, the dispersion of tumors and the reduction to a healthy state of the granular eye lids of the conjunctivitis. Dr. Augustin Goelet now calls attention to the adaptability of this principle to the control of hemorrhage, especially in connection with internal operation, such as are frequently to be carried out in gynecology. Dr. Goelet does further commendable service by show-ing wherein it has at times proved unure can, to a great extent, be avoided. He insists that if the applications are persevered with and are properly made they will, in the majority of cases, conthey will, in the majority of cases, con-trol an active hemorrhage. One point of supreme importance is that there should be actual and complete contact between the electrode and the surface this object the use of an enlarged and possibly egg-shaped electrode may at times be advisable. It is most satisfactory to know, on such authority, that electricity can be so effectively applied to a disastrous ailment, against

SWIFT VENGEANCE BY THE SHAH

from Persia relating an instance of swift vengeance on the part of the Minister McDonald, in behalf of the American missionaries. One of their Oroomia, while riding home from the country in the evening, when within a little more than a mile of the town. into adjoining woods, and treated in a most unmerciful manner.

He was forced, under threat of instant death, to surrender all the money and other valuables which he had about him. Then they stripped him of his clothing, in the bitter cold, and left him half dead, saying that if he moved from where he was in so many minutes he would be shot.

When the time had expired the out-raged man dragged himself to the road, and finally reached home in a

The facts were immediately reported to the American minister at Teheran. who promptly laid them before the prime minister with a demand for the prompt arrest and punishment of the criminals. The prime minister im-mediately telegraphed peremptory orders for their arrest

The robbers, four in number, who proved to be notorious outlaws, were captured after a stout resistance and put to death. This summary and sanguinary ending of the affair was at once reported to the American minis-ter by the prime minister. The American minister thanked him for his prompt action in the matter, and then put in a claim for damages for Mr. St.

MODERN BURGLARY.

tions of an Cotsider Upon the Trade in England. Roughly speaking, burglars practice either as housebreakers or ware burglars. In the case of the last, the iron safe is the object of attack, and as the watchman is either absent, decoyed away, or an accomplice, the implements used are of the largest kind, and their use not unaccompanied by noise. "Jimmies," or steel crowbars, from and with hooked points like eagles' beaks, ponderous "braces" for drilling holes into the locks of safes, steel wedges, and leaden hammers faced with leather to deaden sound, even canisters of gunpowder for blowing out

the locks, are part of the equipment of "Family burgling" is a separate branch of the art. The tools are far more delicate, and means of escape must be provided in addition to those of forcible entry. Neat ladders of tarred rope, for fixing to porticoes as a ready means of descent, are an old precaution. But the wire and string entanglements which are now invariably stretched across the paths and gardens of villas and country residences in order to trip up pursuers are a recent improvement generally adopted by the

The equipment of the warehouse burglar is too bulky for hand carriage, and is always taken to the scene of

The house burglar carries his tools in his long overcoat; a broken overcoat button, of which one-half was found on a smashed window sill, was once used to identify a burglar. Some of the "jimmies" at Scotland yard are of very careful workmanship, unscrewing in the center, and able to be concealed in a hat. Masks are antiquated precau tion. One is, however, preserved, which was worn by a burglar who was etected under a bed in a public house

Burglaries committed after nine o'clock incur a heavier penalty than o'clock incur a heavier penalty than by the Sultan, by which all studies are housebreaking achieved before that suspended for a few months, and the hour. For this and other reasons the students are sent off to their homes all time of dinner is usually selected for the looting of a large establishment. This has only one drawback. It leaves little time for exploration, and the burglar must be well acquainted with the interior of the house. In this connection women play an important and usually an unconscious part.

It is not difficult for a nice-spoken young man to get on friendly terms with the maid servants in a large establishment, and servants take a special pride in showing their friends and admirers round a well-appointed house. A judicious appreciation of the taste displayed in the mistress' boudoir leads naturally to a view of the bedroom, naturally to a view of the bedroom, and not seldom to voluntary information as to the position of the jewel box or safe. Nearly all the recent great jewel robberies from private houses have been extended during the dinner and cheese-making are carried on upon an extensive scale.

"Now," said the storekeeper as he gazed proudly at the lettering on his new brass sign, "that's what I call polished English."—Washington Star.
